### **DETAILED ACTION**

This communications is responsive to amendment filed on July 31, 2006.

Applicant cancels claims 10-16, and amends claims 1, 4 and 7.

#### ***Allowable Subject Matter***

1. Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance: Claims 1-9 are allowable over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior art which teaches an image processing method and apparatus for eliminating noise from electronic data of an input image by smoothing the electronic data wherein the smoothing intensity is computed on the basis of a distribution expression representing the frequency of noise with respect to the predetermined color component in such a manner that when the smoothing intensity with respect to the intensity of the predetermined color component output from the pixel of interest is high/low, a rate at which the intensity of the predetermined color component output from the pixel of interest to be distributed to surrounding pixels constituting the matrix is set to a large/small value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. Uchiyama (Japanese Patent No. 09330401) discloses a system and method for dividing area of color picture for smoothing a picture in the neighborhood of each pixel concerning various sizes of scale factors.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Madeleine AV Nguyen whose telephone number is 571 272-7466. The examiner can normally be reached on Tuesday-Thursday 12:30-6:30pm.
